# PRINCIPLES OF ENNEAGRAM

As a core framework, we use the Enneagram methodology to assess the team, identifying the strength and evolutionary cooperation between all team members. This process helps teams create more robust and effective relationships, cultivate compassion and become happier at work.

Mindfulness and leadership are the two main pillars of Bevel's approach to authentic leadership. Together, they reveal team-awareness, social skills and adaptability as they relate to the 9 personality types. Your team will learn to develop emotionally, promote interpersonal skills and understand why others act and speak a certain way. Discover how to eliminate conflict in the team and understand the source of bottlenecks. Most importantly, leaders will get to know their team members better, even deeper. They will lead more effectively and become powerful role models of authentic leadership in their organisations.

# PROGRAMME AGENDA

In just four days, you will identify what is holding your team back as you develop core strengths and discover new and critical ways to collaborate. Make significant progress in positioning your team for the future with a clear awareness of capabilities and reinforced trust. The purpose of this programme is to connect you with your team at an authentic level. This requires deep self-reflection along with thoughtful team-introspection. We will help you visualise a future that resonates with all team members and aligns with your company's business goals, values, and core mission.

With Bevel, you can:

- Prevent workplace disfunction and mitigate risk while preparing or implementing organizational transformation. This programme helps leaders hold their teams together and support each other during what could otherwise be a strenuous process.
- Rebuild and strengthen employee engagement following this period of remote work, and enhance the collaboration between team members in a new work setup.
- Tap into limitless ways to advance as a team while forming better relationships and building mutual trust. Elevate the inner strengths of individual team members and learn how to align them to support team goals.
